- **Backend:** Node.js, PHP, ASP.NET, C#, Python, Java
- **Databases:** SQL, PL/SQL, MongoDB, MySQL
- **Tools:** Git, GitHub, Microsoft Office

Work Experience
Generative AI Intern - TCR Innovation (Remote)
Oct 2024 - Dec 2024 (3 months)
- Utilized **Pandas** for **data preprocessing, optimization, and feature engineering** to support AI model development.

Hackathons & Achievements
- **Alegria Web-weaving Hackathon - Alegria, Panvel, India**
  - **Secured 1st Rank**
  - Developed **"Radio Rewind,"** a **retro music streaming website** in just **6 hours**.
  - Showcased **skills in web development, teamwork, and creative problem-solving**.
- **Fastest Coder First | Hackathon - Microsoft, Bangalore**
  - **Led a team of 3** to develop a functional **command-line weather tool** in **Python**.
  - Utilized **Weather API** and demonstrated **ability to work under pressure**.
- **Aura Hackfest Hackathon | Geek For Geeks - Somaiya Vidyavihar**
  - Created a **dynamic and responsive website** in a **24-hour hackathon**.
  - Demonstrated **ability to deliver results within strict deadlines**.

Projects
- **AI Content Summarizer**
  - An **advanced AI-powered tool** that **shortens lengthy content** into key points, making information **quick, simple, and efficient!**
  - **GitHub:** https://github.com/Shadab-2604/Summarizer
- **Expense Tracker API**
  - A **secure and efficient API** for tracking expenses, **categorizing transactions**, and generating **financial summaries**.
  - **GitHub:** https://github.com/Shadab-2604/Backend-PR/tree/main/Beginner/expense-tracker-API
- **Weather API**
  - A **custom weather API** integrating with a **third-party service** and implementing **caching for optimized performance**.
  - **GitHub:** https://github.com/Shadab-2604/Backend-PR/tree/main/Beginner/weather-api
- **Full Stack Cafe Website**
  - A **dynamic and responsive PHP and MySQL-based** online coffee shop simulation with **user authentication, cart functionality, and order tracking**.
  - **GitHub:** https://github.com/Shadab-2604/Sitarabucks-PHP
- **Java Banking System with MySQL Integration**
  - A **secure and robust console-based banking system** in **Java**, with **MySQL database integration** for account management and transaction processing.
  - **GitHub:** https://github.com/Shadab-2604/JAVA-Banking
